

The City of Nuremberg:

Discover Nuremberg – as a lively city of about half a million inhabitants, with a visible history of almost one thousand years.

Nuremberg – as a city "of wit", where inventiveness and the researchers curiosity have found a home.

Nuremberg – as a high performance economic location.

Nuremberg – as an open, tolerant city with a very high quality of life.

And Nuremberg – as the centre of a European Metropolitan Region with 3.5 million citizens.

Internship for students in Nuremberg/
Germany

- **improving German language skills**
- **making a workexperience**
- **mediation of intercultural know-how**

Since 15 years we provide so called "stage seminars" to students from different European countries and the US.

Our clients are schools, universities, and individual persons.

The objective of these seminars is

- to convey work experience and knowledge in any profession the students are involved,
- improving German language skills but also
- the mediation of intercultural knowledge.

Living with a guest-family

Our participants have the possibility to live with selected host parents in Nuremberg, who live centrally with direct connections to the public transport system of Nuremberg.

Any student gets his own room for the duration of the stay and will be fully integrated into family-life. The host parents are preparing an extensive breakfast and lunch-package. In the evening the students are integrated into the german family dinner.

Living in your own apartment

If our guests prefer to live alone or together with one or more friends we will organize fully equipped apartments. We try to satisfy any individual wish for the standard of the apartment. During the planning phase we provide our guests with detailed information and pictures about possible apartments to rent until we find satisfying solution. Of course we would also organize Hotel-rooms

The internship:

Each participant receives an internship in a Nuremberg company that fits to his professional

qualifications, personal skills and inclinations. You will be fully integrated in German business-life. You tell us in which profession you want to make the internship and we will find an interesting stage place. No matter if you prefer to work with a lawyer, in a creative area or within handicrafts. Throughout our long-termed experience in this field we are in close contact with a lot of enterprises that cover any profession.

The language training

CCCE-Euroservice provides tailor-made

language training for individual, business, corporate and public sector needs. The training can take place at the students home or in our seminar rooms. It depends on the wishes of our clients if we teach in single-training situation or within in small groups.

The training concentrates on the individual needs and wishes of our clients. As soon as we have established your needs, we get to work to design a course specifically to meet your requirements. We take into account your current knowledge, the amount of time you have to devote to the language and the terminology you are looking for eg. 'survival skills' for beginners or more specialised terminology (financial, business, technical) for advanced delegates.
